UNIVERSITY *of* MISSOURI

THOMPSON CENTER FOR AUTISM & NEURODEVELOPMENTAL DISORDERS

Intervention Services Division

The mission of the ISD is to provide evidence-based, individualized, behavioral treatment and professional training that improve the lives of individuals with autism and neurodevelopmental disorders. We strive to reference and contribute to new discoveries in the field of Applied Behavior Analysis.

Individual Services

The Intervention Services Division offers individualized behavioral treatments both in the clinical setting and in the community.

Who do we serve?
Individuals between the ages of 18 months and 22 years who have a diagnosis of an Autism Spectrum Disorder (ASD), neurodevelopmental disorder, or other health condition that affects development and results in concerns in the following areas:

- Language & communication
- Social skills
- Play skills
- Self-help skills including toileting and feeding
- Problem behaviors, including but not limited to:
  - Difficulty following directions
  - Repetitive behaviors
  - Self-injury
  - Mild aggression
  - Property destruction
  - Running off

What are the typical services provided?
- Behavioral assessment
- Development of individualized treatment plan
- Training of parents/caregivers to implement treatment plan
- Follow-up to monitor and adjust treatment plan
- Consultative services for school districts with students with the needs listed above

Training

The Intervention Services Division offers training workshops related to behavioral interventions for individuals with autism and other neurodevelopmental disorders.

- Full day (6-hour) or half-day (3-hour) sessions
- Lecture-based and/or hands-on practice
- Visit http://thompsoncenter.missouri.edu/training to view a menu of intervention workshop topics.

Please contact Monica Mann by phone at 573-884-4660 or by email at MannM@missouri.edu for more information about our services, trainings, or financial assistance.
