

Global Autism Interactive Network (GAIN)

Quarterly Format

Each quarter focuses on one Module (e.g., Module 1)

- **First Month (Watch)**

- ADOS-2 administrators will listen and learn from trainers to calibrate an assigned module. The discussion will be amongst the trainers; thus, providing a model for administrators on how to approach codes.

Commitment: Watch assigned ADOS-2 recording and submit codes.

- **Second Month (Do)**

- ADOS-2 administrators will calibrate an assigned module under the supervision of the facilitating trainer.

Commitment: Watch assigned ADOS-2 recording and submit codes.

- **Third Month (Share)**

- ADOS-2 administrators will extend their knowledge through general discussion of administration guidelines and codes of the assigned module. The facilitating trainer will then discuss current/seminal research related to the field. Other professional development opportunities relevant to ADOS-2 and autism diagnostics may be included as well.

Commitment: Review a research article.
