

Autism Friendly Customer Questions

We want to help ensure that individuals with autism and their families have a positive experience. We have some questions that, if you are comfortable with answering, could help us make your visit as comfortable as possible.

Do you have any particular questions or concerns about your upcoming visit?

Does your child have any specific preferences, such as sounds, foods, toys, etc?

Are there any fears or factors that increase anxiety that would be important for us to know about?

Do you or your family member have a preferred mode of communication?

Are there any strategies that you would like our staff to be aware of if you would need or want assistance?

Are there preferred ways that you would like our staff to interact with you or your family member?

Are there any other things that we should know to help your visit be as positive as possible?

Would you like a copy of our visual supports?
